Migration assay (skin repair stimulation).

It shows combining exosomes with effective factors increases cell migration capability.

BIONET

exosomes can help

- Skin Texture
- Wound Healing
- Hair Care
- Skin Regeneration
- Reduce Inflammation
- Boost Collagen

Stretch Mark

Wrinkle

Seborrheic Dermatitis

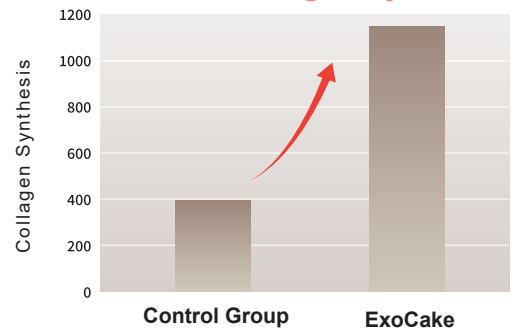

What is Exosome

Exosomes are cell-derived extracellular vesicles (EVs), they are playing important roles in intercellular communication by carrying various biomolecules to modulate cell microenvironment, regulate gene expression, and induce cell differentiation.

The therapeutic value of exosomes in cosmetics are anti-inflammation, repair and skin regeneration.

Exosomes may become a positive therapeutic option for many skin conditions.

ExoCake

Source:
Human Umbilical MSC

Package:
Powder 150 mg + Essential 8 ml

Skin care:
Brightens skin, softens fine lines and wrinkles, and improves skin tone and texture.

EXOVIA

Source:
Human Umbilical MSC

Package:
Frozen liquid 3 ml/vial

Skin care:
Visibly reduces wrinkles, refines acne scars, diminishes stretch marks and promotes hair restoration
